Download deploying windows 7 essential guidance

WDS Properties

General | PXE Response | AD DS | Boot | Client
DHCP | Multicast | Advanced | Network

If Dynamic Host Configuration Protocol (DHCP) is running on this server, check both of the following check boxes and use DHCP tools to add Option 60 to all DHCP scopes.

If a non-Microsoft DHCP server is running on this server, then check the first box and manually configure DHCP option 60.

If DHCP is installed on a server that is located in a different subnet, click the link below for more information.

☐ Do not listen on port 67

☐ Configure DHCP option 60 to indicate that this server is also a PXE server.
